### **DETAILED ACTION**

This Office Action is responsive to Applicant's Amendment and Remarks, filed 13 Oct 2010, in which claim 1 is amended to correct a minor informality and new claims 32-35 are added.

The declaration of Dr. Soili Peltonen (inventor), submitted by Applicants on 13 Oct 2010 under 37 CFR § 1.132, is acknowledged and will be further discussed below.

This application is the national stage entry of PCT/FI03/00796, filed 24 Oct 2003; and claims benefit of foreign priority document FINLAND 20021904, filed 25 Oct 2002; currently an English language translation of this foreign priority document has not been filed.

Claims 1, 5-12, 14, 15, 22-29 and 31-35 are pending in the current application and allowed herein.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

#### ***Objections Withdrawn***

Applicant's Amendment, filed 13 Oct 2010, with respect to objection to claim 1 has been fully considered and is persuasive, as amended claim 1 does not recite wherein said acid catalyst comprises phosphorous.

This objection has been **withdrawn**.

***Rejections Withdrawn***

Applicant's Remarks, filed 13 Oct 2010, and the declaration of Dr. Soili Peltonen (inventor), submitted by Applicants on 13 Oct 2010 under 37 CFR § 1.132 with respect to claims 1, 5-12, 14, 15 and 22-29 rejected under 35 U.S.C. 103(a) as being unpatentable over Roth (US Patent 3,346,558, issued 10 Oct 1967, of record) in view of Leitheiser et al. (Ind. Eng. Chem. Res. Dev., 1966, 5(3), p276-282, of record) has been fully considered and is persuasive, as Applicant's remarks in view of evidence provided by the rule 132 declaration is persuasive that the basic and novel characteristics of instant invention as claimed are apparent in the product made by the instant process and further that these basic and novel characteristics of molecular weight and properties of color, viscousness and flexibility are not expected results of the process taught by the prior art. Roth teaches equivalence of strong acid catalyst suggesting equivalent results, and Leitheiser et al. teaches only reduced coloration from addition of phosphoric acid and does not teach a difference in the molecular weight of the product made substitution of acid catalysts. Therefore Applicant's remarks in view of evidence provided by the rule 132 declaration are persuasive that Roth in view of Leitheiser et al. is not encompassed within the claims reciting the "acidic catalyst consisting essentially of" the recited phosphorus-containing acids because the invention of Roth in view of Leitheiser et al. introduces steps or components that would materially change the characteristics of applicant's invention.

This rejection has been **withdrawn**.

Applicant's Remarks, filed 13 Oct 2010, and the declaration of Dr. Soili Peltonen (inventor), submitted by Applicants on 13 Oct 2010 under 37 CFR § 1.132 with respect to claims 1, 5-12, 14, 15, 22-29 and 31 rejected under 35 U.S.C. 103(a) as being unpatentable over Roth (US Patent 3,346,558, issued 10 Oct 1967, of record) in view of Leitheiser et al. (Ind. Eng. Chem. Res. Dev., 1966, 5(3), p276-282, of record) and further in view of Fuzesi (US Patent 3,399,190, issued 27 Aug 1968, of record) has been fully considered and is persuasive, as Applicant's remarks in view of evidence provided by the rule 132 declaration is persuasive that the basic and novel characteristics of instant invention as claimed are apparent in the product made by the instant process and further that these basic and novel characteristics of molecular weight and physicochemical properties of color, viscousness and flexibility are not expected results of the process taught by the prior art. Roth teaches equivalence of strong acid catalyst suggesting equivalent results, Leitheiser et al. teaches only reduced coloration from addition of phosphoric acid and does not teach a difference in the molecular weight of the product made substitution of acid catalysts, and Fuzesi does not teach or fairly suggest the results of the instant process would affect the molecular weight of the product. Therefore Applicant's remarks in view of evidence provided by the rule 132 declaration are persuasive showing unexpected results regarding the molecular weight and resultant physicochemical properties apparent in the product of

the instant process that are not taught or fairly suggested by the teaching of Roth in view of Leitheiser et al. and further in view of Fuzesi.

This rejection has been **withdrawn**.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
